

# Build Blockchain Apps

Blockchain is everywhere in the news these days, but how do you actually develop your very own Blockchain app?

Come to Galvanize to learn how to develop Blockchain apps with the Open Source Hyperledger Composer Playground web sandbox and the Hyperledger Fabric.

And of course, Hyperledger, hosted by the Linux Foundation, is an open source collaborative effort created to advance cross-industry blockchain technologies.

We will develop a Perishable Goods Network, an Auto Dealer Network and time permitting, a Decentralized Energy Network that all will run on your laptop.

## Pre-Requisites:

Please complete pre-reqs prior to event: <http://hyperledger-fabric.readthedocs.io/en/latest/prereqs.html>

On the day of the event you will need: a laptop, basic knowledge of Blockchain and a burning curiosity.

## Schedule:

10:00 Sign-in, mingle, food, welcome.

10:20: Introduction to IBM Blockchain and Hyperledger

10:30: Lennart: Introduction of the labs.

10:40: Coding starts, work in teams.

Lab 1: Hyperledger Composer Playground and the Perishable Goods Network

Lab 2: Fun with cars and Hyperledger Fabric

Lab 3: Decentralized energy with Hyperledger Composer

2:00pm: Event ends
